- Leadership

👤 About Me

I'm a passionate developer skilled in web and mobile app development, 3D SketchUp design, and network marketing. I specialize in creating innovative, user-friendly products with intuitive interfaces and robust back-end systems. My experience in network marketing has enhanced my ability to connect, collaborate, and achieve impactful results. With a curious mindset and drive for innovation, I'm always exploring new technologies and ideas. Let's connect and create something extraordinary together!

🎓 Education

Bachelor of computer science and technology(reading)
uva wellassa university of Sri lanaka

I am an undergraduate student at Uva Wellassa University in Sri Lanka, where I am actively involved in a dynamic academic community. The university provides a stimulating environment that encourages innovative thinking and hands-on learning, allowing me to expand both my technical knowledge and critical problem-solving skills. I am proud to be part of an institution that values academic excellence and fosters personal growth, preparing me to make a meaningful contribution to society in the future.

💼 Experience

- **coordinator**

  I am a coordinator at TBS Kandy, The Business School Kandy, where I play a pivotal role in managing academic and administrative activities. In my position, I collaborate closely with faculty, staff, and students to ensure a seamless educational experience, organize events, and facilitate effective communication across departments. I am proud to contribute to an environment that nurtures innovation and academic excellence, helping to shape the future leaders of the business world.

- **Teaching**

  I am an experienced educator at ICS, where I teach Science and Mathematics to ordinary level students. I utilize innovative teaching methods and interactive lessons to simplify complex concepts and foster critical thinking.
